Subject: RE: Meeting Request

Hi Walt,

The meeting has been scheduled for Thursday, April 30, from 1pm – 2pm, at the Office of Resource Conservation & Recovery in Crystal City, VA. For your reference, our address is:

Two Potomac Yard

2733 Crystal Drive

Arlington, VA 22202

Please be sure to arrive about 15 minutes early to allow time to pass through the screening procedures in our lobby. Please call Deana Nisbett (703-308-0162); Robin Parker (703-347-8022); or Rita Chow (703-308-6158) when you arrive in the lobby and someone will come down to sign you in.

You mentioned that, in addition to Field Turf, there may be two other companies joining the meeting. Which other companies will be in attendance? Thank you, and we look forward to meeting with you next week.

Kind Regards,

Nicole

Nicole L. Villamizar

Acting Chief, Industrial Materials Reuse Branch

U.S. EPA Office of Resource Conservation & Recovery

1200 Pennsylvania Ave., N.W. (MC 5306P)

Washington, DC 20460

Subject: RE: Meeting Request

Dear Mr. Sanders,

I and my office director colleagues would be pleased to meet with you. We have a team of people from the Offices of Chemical Safety and Pollution Prevention, Children's Health, Solid Waste and Emergency Response and Research and Development that are following tire crumb issues. It is my understanding that a similar meeting was held late last year during which you provided the Agency with useful information. We would welcome as you suggest another meeting to learn about information that you may have acquired since our last meeting.

We will explore the availability of our principals for the times you suggest and let you know what we are able to work out. Feel free to reach out to me directly but so you are aware, my primary point of contact for scheduling is Ms. Deana Nisbett and my technical and policy contact from OSWER is Ms. Nicole Villamizar. Both are copied on this email.

Sincerely,

Barnes Johnson

Memorandum

April 2, 2015

TO: Barnes Johnson, Director of the Office of Resource Conservation and Recovery.

CC: Michael P. Firestone, Ph.D., Regulatory Support & Science Policy Division, Office of Children's Health Protection

CC: Jacqueline McQueen, Office of Research and Development, Office of Science Policy

FM: Walt Sanders, Van Fleet Associates

RE: Meeting Request on Issues Related to the Safety of synthetic Turf

As you are aware, I represent FieldTurf, and we have had several meetings at EPA with many of your associates to provide the agency with scientific information regarding the efficacy and safety of turf and crumb rubber.

As you know, I had previously requested that you respond to an email I sent to Michael Firestone, which you were asked to respond, regarding the safety of crumb rubber and how certain press reports were mischaracterizing the EPA'S current policy on those matters.

You called me to request additional scientific information regarding the safety of synthetic turf and crumb rubber before you responded to my email, and indicated that such information would be helpful to the leadership of the agency.

At this juncture, we would like to meet with you and other appropriate EPA policy leaders at the Assistant Administrator level, to bring the agency up to date on highly relevant scientific information supporting the safety of crumb rubber. Our briefing would include:

- An update on the current status of legislation, particularly Senate Bill 47, pending before the California State Legislature that would have a direct adverse impact on the use of crumb rubber, intended to help mitigate water scarcity in California;
- An update on a study currently being performed by the California Office of Environmental Health Hazard Assessment (OEHHA);
- A summary of the study design being used in a study being conducted by the University of California at Berkley;

- An analysis performed by an independent toxicologist, with respect to the cancer risk associated with crumb rubber; and,
- An update on communications we have had with other Federal agencies, such as CDC, CPSC, and ATSDR.

We know it will take time to arrange such a meeting, but we would like to target the week of April 27, preferably on either April 28, 29 or 30.

Please let me know if the dates and times are acceptable to those individuals who would be involved in the proposed meeting.

Walt A. Sanders
